

Step 1: Stack 4 sheets of unfolded newspaper on top of each other.

Step 2: Arrange 2 of the sheets to overlap about halfway down with the other 2 sheets so that it forms a square.

Step 3: Carefully fold one of the corners down so that you create a triangle with the stack.

Step 4: Take top point A and fold to meet at half-way point between C and B.

Step 5: Take point B and fold to meet with point D.

Step 6: Divide and fold down 2 of the layers of the newspaper at point C on one side towards the bottom. Do the same on the opposite side.
