

# WHISTLER PURPLEAIR/BAM SEPTEMBER SUMMARY

Monitoring Period: September 1<sup>st</sup> – September 30<sup>th</sup> 2023

Location: Whistler, BC, Canada

Figure 1 - Monitoring Locations

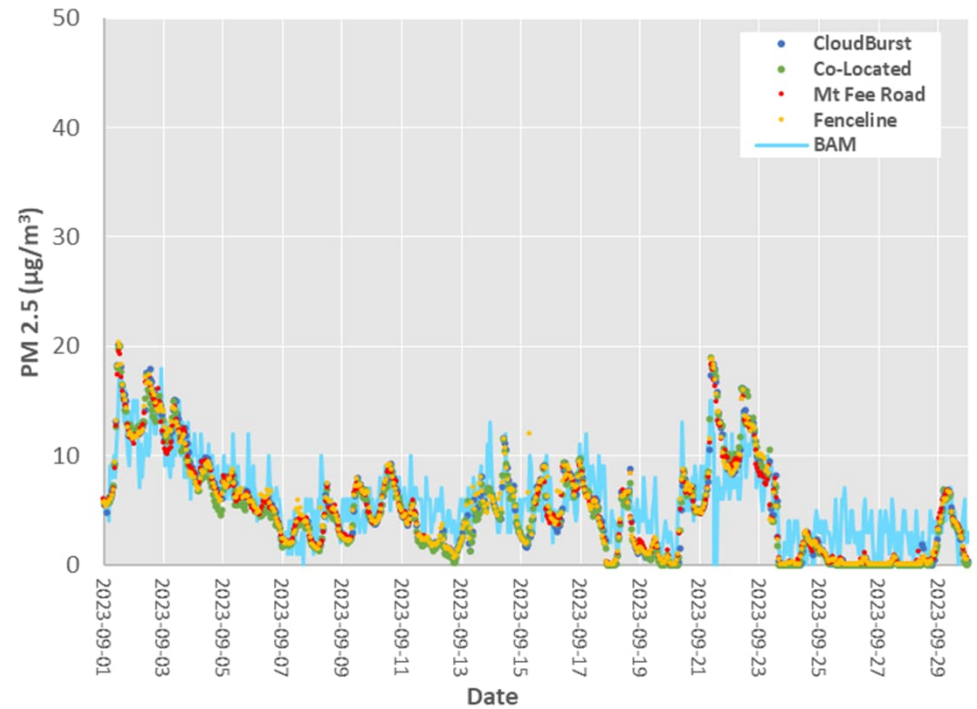

Figure 2 - PM<sub>2.5</sub> Time Series of Purple Air Monitors and Whistler BAM

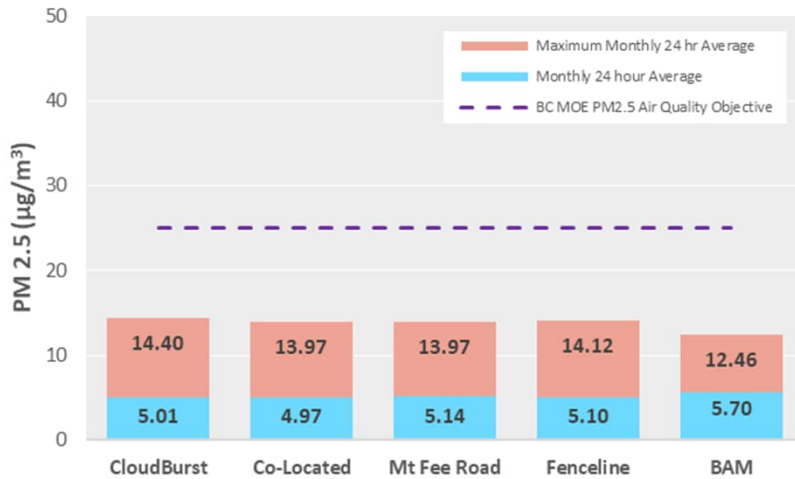

Figure 3 - Monthly Averages and Maximum 24-Hour Averages By Station

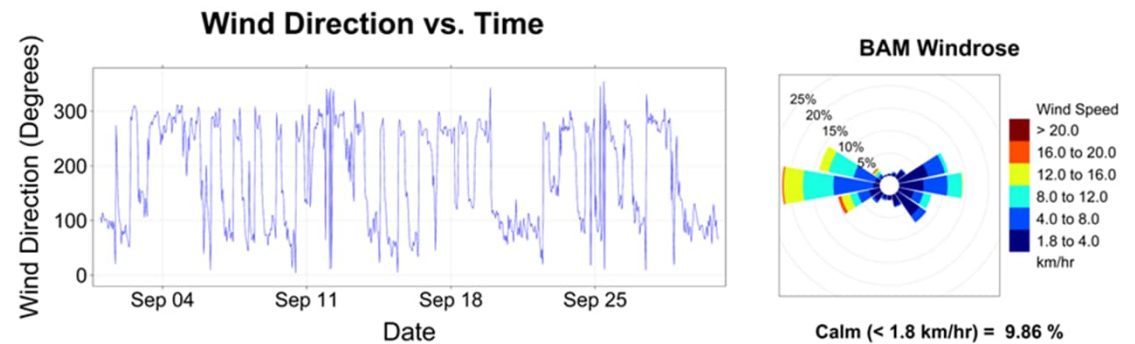

Figure 4 - Wind Direction vs. Time and BAM Windrose

**Discussion:** The 24-hour maximums for the monitors were all below the BC MOE PM<sub>2.5</sub> Air Quality Objective as shown in Figure 3.

The Mt Fee Road monitor did not display data from September 11 to 15 due to a power outage.

Data from the PurpleAir monitors was corrected using Model 7, as suggested by Nilson et al. in the journal Atmospheric Measurement Techniques (<https://doi.org/10.5194/amt-2021-425>).
