A - Addendum #1

Whistler Complete Communities Geospatial Land Use Assessment

RFP Number: P06423-7729.04-2024

Question 1

The Complete Communities program and guide suggests considering engagement with the community. We were wondering whether RMOW is considering the need for public and/or stakeholder engagement as a piece of this work. If this is something RMOW is interested in, are there any specific stakeholders you would consider critical for engagement?

Answer

As noted in the RFP, after Phase 1, advancement to subsequent phases will be conditional on the outcomes of the previous phase, time, and available budget, and subject to approval from the RMOW Project Team.

The RMOW is open to proposals that include engagement with the community. Any proposed engagement activities should be clearly outlined in the work plan. The RMOW has not identified specific stakeholders for potential engagement.
